Little Rapids Corporation announces we have been granted Certification by GMI.

As a global leader in packaging quality services, GMI certifies, monitors and measures the performance of designated packaging suppliers—a process that holds them accountable to established brand owner standards. GMI helps control the variables and ensure brand integrity through printer certification, production run sample measurement and in-store packaging assessments.

The certification is proof that Little Rapids Corporation has been evaluated by GMI – a globally recognized leader in packaging quality management. It also demonstrates that Little Rapids has undergone a rigorous assessment of the required equipment and process controls deemed necessary to produce consistent packaging on a regular basis.

This certification grants Little Rapids inclusion on a network of printers who are approved to produce poly film packaging for Target.
